

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

The Indiana Telephone law has improved my time at home no longer having to answer the phone at meal times only to hear another unwanted sales pitch for - credit cards, home improvements, etc..

The Indiana law has been very effective. We used to receive on average 5 unwanted calls a week and now I might receive one a month. This is very nice and all without an unlisted number.

I am sure this new law is helping to protect the older and less educated people that have been targets of unsolicited calls.

Thanks for listening.
